Welcome to the first in a series of consumable, downloadable books that you print out, cut, fold and glue into educational toys. While you play with your child, your child learns the basics of reading.

We use our virtual world to deliver to you these products, our technical world to download and print the Books. Your time and intent to assemble them, and most importantly your relationship with your child to support their educational play.

The first book changes into ABC the Teaching Train. The train cars are labeled in alphabetical order. The cargo includes three illustrated and labeled word cards for each initial sound: a noun, a verb and an adjective. Playing with this train and cargo teaches sequencing, initial sound and letter recognition as well as introducing the concept of parts of speech.

The second creates a flip page book that helps you teach your child the primary words with the short vowel sound from the approved word lists, and the third book introduces short core sentences. Danny Dolphin 1 and 2 also introduces six more parts of speech, and a book template so that your child can create, write, and illustrate their own story.

Return for new books teaching the long vowel sound and other reading lessons later this year.

Our Books are a fun, economical, easily assembled educational toys that simultaneously support your relationship with your child and your child's learning. Welcome to ABCreadwithme.com, a Siebold sisters' collaborative creation.

Easy to Teach, Fun to Learn
